

Request for Addition of Herbicide, Use Area, or Technique to List of Approved Herbicides

Bonneville Power Administration Use Only

Bonneville Power Administration (BPA) is only allowed to use herbicides that have gone through a BPA environmental review and placed on our approved herbicide list. If there is a product that a BPA employee would like added to that list for use, fill out the request sheet below and mail, fax to: **Manager Pollution Prevention and Abatement – KEP/4** for initiating the review process.

What we will do with the Request

Pollution Prevention and Abatement will look at the potential environmental impacts of the product, compare those impacts with those described in the Vegetation Management Program EIS. If the impacts are similar or less than those analyzed in the EIS, then we will post the proposed addition for public comment and conclude the addition. If the potential impacts are greater than or have not been analyzed in the EIS, we will work with you to determine if there are other products that can meet this need. Products that do not have similar impacts to those described in the EIS will require a supplemental EIS and a new Record of Decision.

Questions?

Call or email Manager Pollution Prevention and Abatement at 503 230-3655 or 503 230-4722.

Product Name _____

Active Ingredient _____

Manufacturer _____

Where would you use this product? (Mark one or more.)

Rights-of-ways Switchyards Landscaping

What would you use this product/technique for? (i.e. selective control, total control, noxious weeds, etc.)

What application method would you use with this product?
