

Release Notes for **Pisces version 3.3**

Release Date: **June 11, 2009**

Welcome to Pisces, version 3.3, our third release in maintenance mode.

Pisces is a web-enabled software application used by BPA and its Fish & Wildlife program participants to track and manage projects throughout the Columbia River Basin. Pisces allows contractors and BPA project managers to collaborate on project definition and ongoing project management over the internet.

Want to find out more about what Pisces is and what you can do with it? Start here:

<http://www.efw.bpa.gov/contractors/usingpisces.aspx>

Besides minor enhancements and bug fixes, changes in Pisces version 3.3 include:

Application

Removing a SOW Revision from a Contract – Faster performance. Large SOW revisions can now be successfully removed without system time-out.

Accruals – Better targeted notifications and reminders. To prepare for this year's upcoming Accrual Season, we've improved notification and reminder emails. Recipients will receive fewer emails – just enough to know when you need to do something in Pisces.

Project Details Tab – Better display of multiple Primary Sponsors. Before not all names were visible in this field. Now you can always scroll to see the list of all values.
