memorandum

DATE: April 26, 2004

REPLY TO
ATTN OF: KEP-4

SUBJECT: Supplement Analysis for the Transmission System Vegetation Management Program FEIS
(DOE/EIS-0285/SA-210-Carson Tap) **Project No. V-R-04/08**

TO: Elizabeth Johnson
Natural Resource Specialist – TFR/The Dalles

Proposed Action: Vegetation Management for the Carson Tap 115 kV transmission line corridor.

Location: Project location is in the BPA Redmond Region in Skamania County, Washington.

Proposed by: Bonneville Power Administration (BPA)

Description of the Proposal: BPA proposes to clear unwanted vegetation from the rights of way and access roads along the Carson Tap transmission line corridor.

Analysis: A checklist (see attached) was completed for this project in accordance with the requirements identified in the Bonneville Power Administrations Transmission System Vegetation Management Program FEIS (DOE/EIS-0285). The checklist evaluated the following areas:

- *Description of right-of-way and vegetation management needed*
- *Vegetation to be controlled*
- *Surrounding land use and landowners*
- *Natural Resources*
- *Vegetation control methods*
- *Debris disposal*
- *Monitoring*
- *Appropriate environmental documentation*

In preparation of this Supplement Analysis, the checklists were reviewed. Specific information regarding the areas as identified above is described in the attached checklists.

Findings: This Supplement Analysis finds that 1) the proposed actions are substantially consistent with the Transmission System Vegetation Management Program FEIS (DOE/EIS-0285) and ROD, and; 2) there are no new circumstances or information relevant to environmental concerns and bearing on the proposed actions or their impacts. Therefore, no further NEPA documentation is required.
